

DO YOU OWN OR OPERATE UNDERGROUND FACILITIES?

If the answer is YES, you are considered a Facility Owner under Public Act 174 of 2013

MEMBERSHIP OPTIONS

MISS DIG 811 offers a variety of membership options for Michigan stakeholders. Under Public Act 174 of 2013, facility owners are required to participate in the state notification center and receive and respond to dig and design tickets. In addition to membership for those required facility owners, MISS DIG 811 also offers Associate Membership options.

MEMBERSHIP - FACILITY OWNERS

As previously stated, facility owners are required to become members under PA 174. They receive member codes that are necessary to positively respond to dig and design tickets. Fees vary based on membership structure.

WHAT DOES IT MEAN TO BE A MEMBER?

When you are established as a member you will begin receiving dig notices, or tickets, when excavators or homeowners are working near your underground lines.

When you become a member of MISS DIG 811 we will create a database of each facility type you own. Each database will have a unique identifying code, referred to as a Member Code. The database will contain information on where to send the dig notices and a map of where your facilities are located so that you receive tickets when digging is occurring near your facilities.
